SNAPJACKET**

**THE
LONGEST LASTING
AFFORDABLE
SOLUTION TO
FIXING DECAYING
PILINGS**

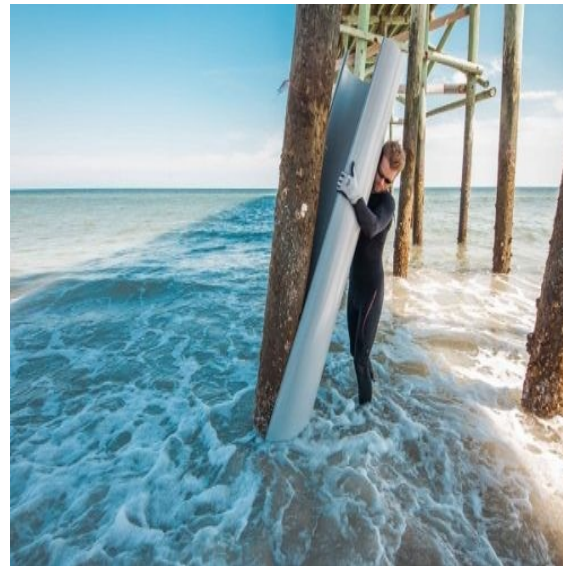

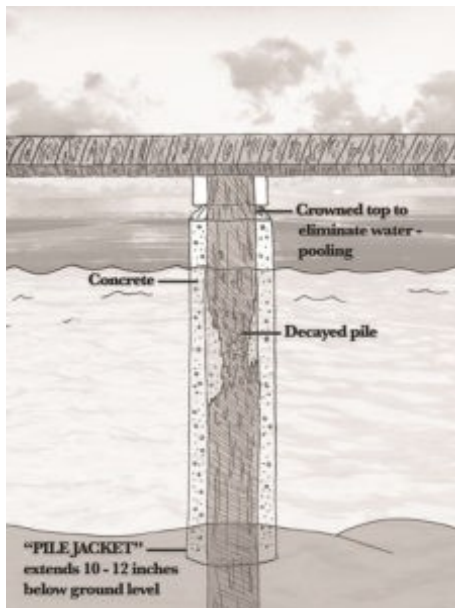

Cellular Concrete Technologies
360 Wallingford Road Cheshire
CT 06410

SIMPLE INSTALLATION

The best system available to repair existing pilings that have been damaged by marine organisms, the ravages of time, elements and harsh marine environments.

Using this unique design, you simply snap into place and fill with concrete. You are left with a fix that will be warranted for 50 years and be just as strong or stronger than the original piling.

- Total protection from destructive marine organisms
- Costs significantly less than replacing a piling
- Will last 50 years + with no maintenance
- Made from environmentally safe and UV resistant PVC
- Stops harmful chemicals leaching into the water
- Installs in minutes

Sizes available

Diameter 8" to 28"

Length 8' to 52'

All modification for custom lengths can be cut to size on site

To install the SnapJacket you need:

- Safety glasses and personal flotation devise
- Ratchet straps
- Bucket and shovel
- Concrete
- Sawzall
- Powerwasher
